

“Promoting New Technologies - Environmental Technology Verification Schemes”

27th August 2009, Charing Cross Hotel, Central London, UK

The aim of this event is to:

- Introduce a European Technology Verification (ETV) Scheme as a tool to promote new environmental technologies
- Share lessons learnt and best practice from the Trittech ETV Project
- Discuss the implementation of a European-Wide ETV scheme and the potential impact on large companies, SMEs and policy makers at regional and national level
- Present the internationalisation of ETV schemes
- Showcase real examples of ETV in practice and the impact on the technology developer

This event will be of interest to:

- Policy makers:** European, national and regional
- Industry:** Large companies and SMEs adopting and developing new environmental technologies
- R&D organisations:** Universities, Research Centres and other organisations with the capability to develop and test new technologies
- Intermediaries:** Business and sector support networks
